
Hello, Beautiful Markdown PDF

This is the Week 1 milestone document.

The conversion pipeline right now is intentionally trivial:

1. Read this Markdown file.
2. Wrap it in an HTML shell (no parsing yet).
3. Ask Chromium to print it as a PDF.

Proper Markdown parsing, Shiki syntax highlighting, and the grayscale Minimal theme arrive in Weeks 2 through 6.

What's Next

- Week 2: real Markdown parsing with unified + remark.
- Week 3: GFM tables, task lists, Shiki syntax highlighting, images.
- Week 4: frontmatter and CLI options.
- Week 5: Minimal theme structure.
- Week 6: callouts, tables, print CSS.
